

Box Overview

Manage Your Content. In The Cloud.

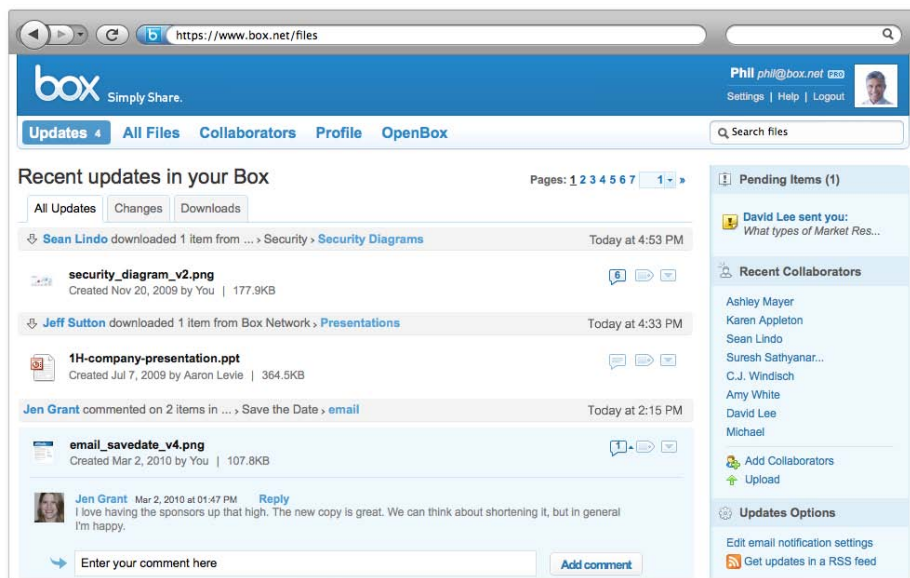

“The number one benefit of Box.net is the ease of use - both for us and for our partners. Box has certainly saved us money, but more importantly it's saved us time and energy.”

By combining the core features of traditional content management with the capabilities of online collaboration software, Box.net is reinventing how businesses share, manage, and access all of their content with Cloud Content Management.

Empowering the new knowledge worker

Capture – Put your content in the cloud for access anywhere, anytime.

- Create and organize multiple layers of folders with various levels of user permissions.
- Download, view, and edit any type of file securely on any web browser.
- Use in cross platform environments, from Windows and Mac OS to Linux.
- Access and view files on-the-go with your BlackBerry, iPhone, iPad, or any other mobile device.
- Brand Box with your logo and color scheme to make users feel safe and secure.

Connect – Share content and collaborate in a secure online workspace

- Create a shared workspace and easily invite anyone, from co-workers to contractors.
- Avoid time-consuming downloads by viewing files in your browser, from Microsoft Office to Adobe Photoshop and Flash video content.
- Leave comments and feedback attached to specific documents, eliminating email overload.
- View or revert back to old files after new versions are uploaded.
- Find the file or folder you need with Box's full-text search engine.
- Discover new and updated content via the real-time Updates tab.

Collaborate – Replace your file server with a smarter, simpler cloud-based solution.

- Share large files easily with a vendor or an entire department.
- Receive automatic email alerts when people upload, download, or update files.
- Use direct web links to share project folders or individual files.
- Streamline workflow by assigning tasks to approve, review, or update files.
- Create widgets to share files on a any web page or create a ‘dropbox’ to privately collect incoming files.

Do more with your content - connect your cloud services

Customize, integrate, or build custom solutions onto Box. In addition to Box’s unique features, you can take advantage of the best services and applications across the web.

- Connect your content to other enterprise cloud services, including Google Apps, NetSuite, Salesforce, and SugarCRM.
- View and edit documents and spreadsheets using Google Docs, EditGrid and Zoho.
- Fax agreements stored on Box with eFax.
- Sign, send, and approve contracts digitally using DocuSign.
- View CAD files in your browser with Autodesk Freewheel.
- Merge and compare multiple document versions with TextFlow.
- Benefit from dozens of additional integrated applications and services.

Powerful yet simple user management

“ Even three and a half years later, we haven't had a need for an expensive server. With Box, we don't need to maintain hardware, we don't have to worry about backups, and we haven't lost anything. ”

Box offers a comprehensive, easy-to-use administrative console for businesses that need to manage dozens, hundreds, or even thousands of users and even more content.

- Easily add, modify, and manage users, set login credentials, and allocate storage quotas.
- Instantly create hundreds of accounts by importing a list of employees from Excel.
- Assign variable user privileges from 'upload only' to full editing rights.
- Password-protect or assign expiration dates to auto-delete or deactivate file links on sensitive materials.
- Generate reports on file and user activity, including logins, downloads, edits, and uploads, for specified date ranges.

Fast and Easy Implementation

Every aspect of Box has been designed with simplicity in mind, including an easy setup and migration experience. As a cloud solution, there is no hardware to buy or software to install. With Box, you can get up and running in minutes - not days or weeks. It's as simple as signing in, setting up your users and uploading your files. That's all there is to it.

Guaranteed uptime and comprehensive security

Box adheres to the highest industry standards for security so you can share, access, and manage your content with confidence.

- **Secure data centers:** Your content is stored on enterprise-grade servers that undergo regular audits and are monitored 24/7.
- **Redundancy:** Files are backed up daily to additional facilities.
- **Data encryption:** Data is encrypted with 256-bit SSL when in transfer and at rest.
- **Uptime guarantee:** Box.net guarantees a 99.9% network uptime.
- **AD/LDAP integration:** Enterprise edition customers can replace Box.net's authentication mechanism with their own.

A team constantly at work - for you

The entire Box.net team is with you every step of the way. While we have designed Box to be the simplest solution for keeping you connected to your content, people, and ideas, we have a support staff dedicated to making sure you get your questions answered and the help you need. Driven by customer feedback, the Box.net development team is constantly working to make the product better everyday (with updates pushed every week), so you get the best experience each time you sign in.

About Box.net

Founded in 2005, Box.net provides Cloud Content Management for over 4 million users and companies ranging from small businesses to the Fortune 500. Box.net's dynamic, flexible content management and collaboration solution empowers users to access and share content online, and gives IT professionals unprecedented visibility into how content moves within their organizations and beyond.
