www.cloudcommerce.com

Cloud Commerce is committed to serving the IT and Application needs of businesses. Our unique focus on cloud computing allows us to specialize in providing comprehensive cloud computing services, so that our customers can save money on technology and focus on growing their business.

Cloud Commerce will provide Cloud Focused Consulting Services to assist the customer in selecting and purchasing the best solution for their specific business needs. We will setup a no cost, no obligation high-level review of your current technology. We can then provide you with our recommendations on how to start saving money.

Cloud Strategy Framework

Why We're Different

While there are many companies that provide a broad range of IT services to small businesses, most focus on "on-premises" based solutions that require up-front license expense, costly installation engagements and ongoing maintenance fees. These firms have concentrated on this type of high margin solutions delivery model as a primary part of their core business. Cloud Commerce focuses entirely on the On-Demand marketplace and works to actively differentiate ourselves to you as "A New Approach to Small Business Technology".
